

A one-act play by Eugene Gladstone O'Neill, who was an American playwright and Nobel laureate in Literature. His plays are among the first to introduce into American drama the techniques of realism, associated with Russian playwright Anton Chekhov, Norwegian playwright Henrik Ibsen, and Swedish playwright August Strindberg. His plays were among the first to include speeches in American vernacular and involve characters on the fringes of society, engaging in depraved behavior, where they struggle to maintain their hopes and aspirations, but ultimately slide into disillusionment and despair. O'Neill wrote only one well-known comedy (*Ah, Wilderness!*). Nearly all of his other plays involve some degree of tragedy and personal pessimism. -- from Wikipedia

Find out what an abortion involves, how you can get one on the NHS, and what support is available to help you make a decision. There are two types of abortion treatment: the abortion pill (medical abortion) and surgical abortion. Treatment depends on how many weeks pregnant you are. The abortion pill is in fact two medicines. The first medicine ends the pregnancy and is named mifepristone. It works by blocking the hormone progesterone. All women should have access to accurate information about abortion so they can make their own informed decisions. Abortion is the termination (end) of a pregnancy. Most abortions are performed during the first trimester of pregnancy (up to 12 weeks), but some may be performed .

Surgical abortion is a safe and straightforward day-surgery procedure that is most commonly performed in the first trimester (up to 12-14 weeks' gestation). We specialise in abortion treatments, advice and support for women considering their pregnancy options.

The debate over whether or not abortion should be a legal option continues to divide Americans long after the US Supreme Court's decision on *Roe v. Wade*.

The National Abortion Federation (NAF) is the professional association of abortion providers. We believe that women should be trusted to make.
