

The Anarchist Roots of Geography sets the stage for a radical politics of possibility and freedom through a discussion of the insurrectionary geographies that suffuse our daily experiences. By embracing anarchist geographies as kaleidoscopic spatialities that allow for nonhierarchical connections between autonomous entities, Simon Springer configures a new political imagination. Experimentation in and through space is the story of humanity's place on the planet, and the stasis and control that now supersede ongoing organizing experiments are an affront to our survival. Singular ontological modes that favor one particular way of doing things disavow geography by failing to understand the spatial as a mutable assemblage intimately bound to temporality. Even worse, such stagnant ideas often align to the parochial interests of an elite minority and thereby threaten to be our collective undoing. What is needed is the development of new relationships with our world and, crucially, with each other. By infusing our geographies with anarchism we unleash a spirit of rebellion that foregoes a politics of waiting for change to come at the behest of elected leaders and instead engages new possibilities of mutual aid through direct action now. We can no longer accept the decaying, archaic geographies of hierarchy that chain us to statism, capitalism, gender domination, racial oppression, and imperialism. We must reorient geographical thinking towards anarchist horizons of possibility. Geography must become beautiful, wherein the entirety of its embrace is aligned to emancipation.
